Price per item: 109.90 €  
(incl. VAT, excl. Shipping)

- Wood / Finish / Color  
plywood white

- Size  
W/H/D 60 x 18 x 26.6 cm

- Delivery content  
Delivery consists of 1 set = 2 complete shelves containing 6 plywood parts, 4 rods (side supports), assembly material, assembly instructions

- Material  
This wall-mountable DVD book rack is of 18mm thick beech plywood with differently colored surfaces. STORIT is attached to the wall with concealed fittings.

Short information on plywood: plywood is multilayered and grouted solid wood veneer with a resin-coated surface in different colors. The plywood edges are natural and untreated. Detailed information on the base material and the properties in the material overview.

- Usage  
Given the height, the LIBRIT DVD-shelf is particularly suitable for DVDs, books, pictures, collectibles, as a board, spice rack, kitchenware shelf...  
Because of the variable system, the shelf is also perfect for the media-, living-, kitchen-, hallway- or working space. Mounted in a row, LIBRIT is forming a small sideboard or a hallway-shelf for keys, a cell-phone, business cards or jackets, for example, with a row of clothing hooks beneath them. Or, mounted in two rows, the LIBRIT transforms into a spacious CD / Media shelf for your music library or into a representative kitchen shelf.

- Capacity  
With the side supports inserted, it stores up to 37 standard-sized DVDs or 15 standard-sizes soft cover books or VHS cassettes.

- Extras / Special  
Due to the modular design you are given numerous possibilities on how to arrange your LIBRIT DVD (and STORIT CD-) shelves. So you can take advantage of the available space and create a rack system to your liking.  
Hint: sufficient amount of space between each shelf modules, helps you create additional storage space without the need of an extra shelf.  
The acrylic rods inserted on both sides prevent the DVDs from tilting. If required, the bars may also be omitted.

- Weight including packing material in kg  
11.40
