Price per item: 359.40 €
(incl. VAT, excl. Shipping)

- Wood / Finish / Color
cherry wood; glass clear
cherry wood; glass sat. [+50.00EUR]

- Size
B/H/T 50 x 198 x 20 cm (front edge glass panes)
Intermediate tier-height 24cm
Inner length from frame to frame 43 cm
height of 1st glass tier ca. 15cm

- Delivery content
1 Shelving unit inkl. furniture feet, assembly instructions, assembly materials (Delivery without decoration)

- Material
DVD shelf / bookcase made of solid cherry wood timber squares and aluminum tubes, which form a stable frame mounted to the wall. 8 ESG glass panes - safety glass with a thickness of 0.8 cm - are embedded in deep grooves in this shelf frame. The shelf is mounted on the wall using concealed fittings. Another highlight of the QUADRA shelving unit made of wood are the adjustable furniture feet, which can compensate for unevenness in the floor. The wood surface is finely sanded and treated with a satin clear varnish.

- Usage
The glass shelves with a depth of 20cm are specially designed for DVDs and paperbacks. Therefore, this variant is particularly suitable as a representative living room shelf for DVDs or as a bookcase.

- Capacity
The narrow QUADRA shelving unit holds approx. 220 normal DVD cases (normal-sized single cases) and approx. 340 CDs (jewel cases). The individual glass shelves of the wooden shelf can be loaded evenly with approximately 15kg each. Total load: max. 120kg

- Extras / Special
The special feature of the Quadra DVD shelf, reduced to the essentials, is the filigree, but extremely stable construction. The high-quality materials - solid wood, aluminum and glass - are deliberately set in contrast and let the QUADRA bookcase unfold its full effect as a modern shelf unit with classic elements.

- Weight including packing material in kg
35.00
